

X-FACTOR COOL

USER GUIDE

A NEW GENERATION IN TIRE PREPS

GENERAL INFORMATION

Used for light applications when less bite and traction is needed. Ideal for hard, fast tracks and hotter outdoor temperature situations. Great for loose, dusty and sandy conditions. This is the least "potent" of the three formulations. Can be used on all natural and synthetic tire compounds. X-Factor Cool is a safer alternative than other products in the market. **Non-Flammable & VOC Compliant**

USE RECOMMENDATIONS

Will drop hardness of the tire 1 to 2 points depending on number of coats applied. X-Factor Cool is mainly used as an external prep. Starting point for rolling outside - 2 to 4 oz for 6 to 8 hours. Also can be used as a PRW by applying in light coats and using multiple times in order to achieve desired hardness reading. General coat will drop hardness 1 point.

PRODUCT SPECIFICS

- Use as an external prep
- Use as a pre-race wipe
- Can increase the life of a tire
- Will give moderate bite and grip
- Can be used on all makes of tires synthetic and natural
- Can be inter-mixed with other X-Factor Tire Preps
